

4- Week Home Stay Fitness Program

Dumbbells

All materials provided are for educational purposes only, and is not to be used for medical advice, diagnosis or treatment. Always consult your physician before beginning any exercise program.

You should be in good general and physical health prior to starting this or any other fitness program.

HOW TO USE THIS PROGRAM

This program is designed to be completed at home, with just dumbbells! Make any adjustments you need to suit your current fitness levels.

How to Decrease Difficulty

- Remove any plyometric (jumping) exercises
- Reduce number of repetitions
- Reduce number of sets
- Increase rest time
- Do exercise on incline

How to Increase Difficulty

- Include all plyometric exercises
- Increase number of repetitions
- Take all included progressions
- Follow program with Dumbbells
- Add extra sets
- *It is not recommended to reduce rest times*

Indicates an exercises that you can add or remove the plyometric component depending on fitness level

Indicates an exercise that you can add or remove incline/decline depending on fitness level (decline = more challenging, incline = less challenging)

THINGS TO REMEMBER

This program is based on Circuit Style Training. That means you will be performing 3 or more exercises in a row with minimal rest, and taking a longer rest at the end. You will repeat these three exercises a noted number of times. You should complete all rounds of Circuit #1 before moving on to Circuit #2.

Warming Up

Warmups are a necessary evil of effective workouts! Get your blood flowing and warm up your body for 3-5 minutes before beginning. Go for a walk, do some skipping - get your heart rate slightly elevated and get the joints moving!

Cooling Down & Stretch

For best results & to reduce the likelihood of injuries, please stretch out the parts of the body you exercised. Add in another 3-5 minute walk if you can at a slower pace.

HIIT Training

This program has strength circuits and HIIT days. On HIIT days, you want to push yourself as hard as you can, get your heart rate up and really challenge yourself. It is not recommended that you use heavy weights on HIIT days.

Bonus Workouts

Each week has a bonus Ab workout & recommended Cardio Session. You can super charge results by adding in these bonus workouts.

TRACKING PROGRESS

Tracking progress is one of the most effective ways to stay motivated. When you see something working, you're more likely to stick to it! Here are the best ways to track progress during the 4-week Home Stay program.

Measurements

Measurements are a much better indicator of progress. Muscle is more dense than body fat, so if you lose body fat (even if you don't lose weight!) you will notice a loss in inches. Some good places to measure: chest, waist, arms, hips, thighs. Record the measurements to compare later.

Pictures

Taking photos can help you see the difference a fitness program is making for you! Take a photo from the front and side in what ever clothing you're most comfortable. Remember to take subsequent photos at the same time and same location (so the lighting is the same!)

Notes

Make notes on how you feel. Write out how you feel after each workout and see the progress of your energy, ability and motivation.
